In your position paper, I like how you gave statistics. A quote from a leader, the UN or the citizen would show us the perspective of the people involved in this issue.

Did the citizens of Serbia take any actions to resolve this issue?

Is this only happening in Serbia?

I like how you gave examples and how you researched your topic well.  
You also had a few quotes which i thought was good.

Is the whole world suffering through the same thing as Serbia?
